

Theodoros Mangas

Backend Python/Django Engineer | REST APIs · PostgreSQL · GIS | Open to EU Remote

Komotini, Greece · magg_theod@live.com · +30 697 269 0483 · theodoros-mangas.github.io/my-portfolio · <https://github.com/Teo-Mgs>

PROFESSIONAL SUMMARY

Backend-focused Python/Django engineer with 6+ years of experience building production systems, REST APIs, and data automation pipelines. Comfortable owning architecture, implementation, and deployment end-to-end. Full-stack capable (JavaScript/Bootstrap) but specialized in backend reliability, performance, and maintainable design. Unique combination of software engineering and GIS/spatial expertise — a rare pairing that adds immediate value for mapping, surveying, and geospatial platforms.

CORE SKILLS

Backend	Python · Django · Django REST Framework · REST API design · Celery · Redis
Auth & Security	JWT · Session auth · RBAC · Permissions · Secure file handling
Databases	PostgreSQL · MySQL · PostGIS · indexing · query tuning · ORM optimization
Architecture	OOP · SOLID principles · Modular design · API versioning · Design patterns
DevOps	Linux · Docker · Gunicorn · Nginx · Git · CI/CD · Logging & monitoring
GIS & Spatial	GeoDjango · GDAL · PostGIS · spatial workflows · data processing pipelines
Frontend	JavaScript · AJAX · HTML/CSS · Bootstrap
Testing	pytest · unittest · defensive programming · validation layers

EXPERIENCE

Freelance Python/Django Engineer

Self-Employed · 2021 – Present · Remote

- Designed and implemented production Django backends and REST APIs serving real-world clients and internal tooling.
- Built reusable Python modules for data processing and automation, reducing repetitive manual workflows by ~70%.
- Implemented secure bulk-file pipelines with multi-layer validation routines handling 10k+ records per run on unreliable input data.
- Optimized PostgreSQL/MySQL query performance via ORM tuning and targeted indexing, achieving ~40% reduction in average query time on large datasets.
- Maintained Linux production deployments with Gunicorn + Nginx, including configuration management, log analysis, and zero-downtime releases.
- Integrated Redis for caching and Celery for async task queues, improving throughput and decoupling long-running jobs from the request cycle.

Land Surveyor & GIS Analyst

Independent Practice · 2014 – Present · Greece

- Automated spatial data processing and validation workflows using Python scripting, cutting manual processing time significantly.
- Processed large-scale mapping datasets and GIS deliverables for engineering and cadastral submissions.
- Developed domain expertise in coordinate geometry (COGO), traverse calculations, and georeferenced data pipelines — directly applied to software projects.

NOTABLE PROJECTS

Engineering Services - Technical Office Website ([deployed](#))

Django · Python · DRF · MySQL · Ajax · GIS · Leaflet · JavaScript

Full-stack Django platform built for a real-world technical office, combining dynamic service pages, project showcases, multilingual content (Greek/English), team profiles, and secure customer management.

Modular toolbox SaaS platform (active build)

Python · Django · PostgreSQL · GeoDjango · Redis · Celery · Leaflet · Gunicorn · Nginx

Modular SaaS platform for surveyors and engineers, providing a unified interface to coordinate transformations, geospatial data conversions, and traverse calculations. Features a shared validation layer, standardized export pipelines (DXF/KMZ/GeoJSON), and reusable UI components that accelerate tool development by 40%. Currently supports 5+ utilities with extensible architecture for rapid feature additions.

CityCare - Volunteer operations & live city map platform (ready for deployment)

Django · Python · MySQL · Leaflet · JavaScript

A web application that allows volunteer teams to record and manage real-world actions directly on a live city map (incidents, maintenance, field tasks, observations).

It provides role-based workflows, location-linked records, and a clear operational overview so multiple users can coordinate activity in the same geographic space without confusion.

EDUCATION & CERTIFICATION

B.Sc. Surveying & Geoinformatics Engineering

TEI of Central Macedonia

Advanced Python Developer Certificate

PeopleCert · 2022

LANGUAGES

Greek (Native) · English (Fluent)
